Grape Fruit, 3 for 25c.

New Apples, for pie, 3 lbs. 25c.

The 40th Anniversary of "SALADA" TEA

Finest quality for 40 years has built the largest sales in North America.

Ourselves.

Bruce Barton, the well known author and magazine writer, has proposed the toast: "To the only folks who can make us or break us—to Ourselves." And he quotes the saying of Carlyle: "The world being saved will not save us; nor the world's being lost destroy us. We should look to ourselves."

The truth of these statements, differently worded but meaning exactly the same thing, cannot be gainsaid. The biggest factor in the world now, as always, is the individual. No man is actually down and out, defeated, unless and until he himself admits defeat. Furthermore, more people are destroyed by prosperity than by adversity; more people fail to grasp and enjoy the realities of life when the gods are showering them with riches or other gifts than when they are faced with difficulties and confronted with seemingly unsolvable problems.

It is then people begin to call upon latent powers they possess. William James, in his essay on "Vital Reserves," pointed out that underneath our daily store of strength and courage, all of us have reservoirs that are tapped only by emergency. We are all able, under the test, to surprise ourselves with an unexpected capacity to be and do more.

It is that capacity which is our greatest asset. It is our hope in the present and for the future. It is our only power now.

The writer is acquainted with a man resident in one of our prairie cities who lost his position over a year ago. He has a bed-ridden wife not only to support but to care for. He is not an educated man, and prior to losing his position received only a small salary. Did he despair and call upon the Government to put him "on relief"? Not a bit of it! He called upon his own reserves of strength. Although he had no experience, he got a job painting a garage. This led to other small painting jobs. Then at Christmas time he got work soliciting orders on a commission basis. When spring came he hunted up garden work to do. Thus he keeps going. He is seldom idle because he is willing to take on any kind of a job, no matter how humble. And when you meet him he always has a new joke to tell. He goes whistling on his way, smiling to accept Government or municipal relief, always looking forward to better days that must inevitably come, and in the meantime keeping his head well above water. He is a bigger, better man than ever before; he has maintained his self-respect and kept his courage, and, in the days to come, will command a better position than any he might have secured had "hard times" not descended upon him.

This is a very simple illustration of a very ordinary individual. Nevertheless he has and is displaying the spirit of a hero. Yet he possesses nothing that each and every person has not got, namely, a reserve of strength, of courage, of determination, to call upon in times of emergency. But the important thing is—he called those reserves into action. Too many of us fail to do this. We hesitate, we drift, we refuse to use the powers lying latent in us with which we have been endowed. In a word, we have not faith in ourselves, and without that faith anything that others may do for us will fall far short. Such people will come out of the present time of difficulty weaker and less well equipped to take advantage of the opportunities which the future will offer to us.

Let us put ourselves to the test. We have been buffeted about; we may be gasping, but if we are strong of heart and keep on we will get our "second wind." A race is never lost until it is over; we always have a chance to win until the tape at the finishing line is definitely broken. Our success or failure depends, not on the other fellow, but on ourselves.

Had Riel For Customer

Ontario Barber Has Followed Trade For Seventy-Six Years

Louis B. Lafrance, the oldest active barber in the Dominion, celebrated his nineteenth birthday in June. He has been engaged in the trade for seventy-six years, and hopes to be able to continue for another ten or fifteen, he says. He was born in Quebec City, moving to Montreal, where he learned the trade. He then went West and opened a shop in Winnipeg, which at that time was a little more than a village. One of his customers was Louis Riel, the leader of the Northwest Rebellion. Mr. Lafrance and Riel became friends, and he still thinks Louis was a very good man. He was in Winnipeg when Sir John Macdonald went out there to the dedication of Winnipeg as a town. Commemorate some fifty years ago, he settled in Trenton, where he has kept shop ever since. He is the father of nineteen children.

Treacherous Police Dogs

Bringing These Animals Into Canada Looks Like Mistake

The Stratford Beacon-Herald in connection with a case of a lad of six being bitten in Toronto by a police dog, observes that breeds of dogs are agreed that it was a mistake to bring this dog to Canada. It has not the background and tradition of the Collie, the bulldog, the setter, St. Bernard, Newfoundland or any of the other well-known breeds of dogs to which we are accustomed. The police dog is a wild animal, and treacherous in the sense that he cannot be trusted not to take a bite at any moment. The breeding of these dogs should be discouraged, especially for city life.

And now it is reported crocodiles do not cry. Next thing we know someone will muster enough courage to declare there is no such thing as a thing as a weeping willow.

It cost nearly \$12,000,000 to supply London with water in the last 12 months.

Modern conveniences are being introduced in small towns of Albania.

All Her Children Were Troubled With Diarrhoea

Mr. J. J. Bickert, R.R. 1, Enderby, B.C., writes—

"Last summer all my children were troubled with diarrhoea, and were so bad I did not know what to do. A friend told me to give them Dr. Fowler's Extract of Wild Strawberry, so I got a bottle, and after a couple of doses they were soon well again, and I am very thankful to your wonderful remedy. I find it the only one that relieves so easily and quickly."

China Imports Wheat

Forty Million Bushels Imported in Year 1931

Reviewed in the light of official statistics covering imports for 1931, which have just been made available, the past year is revealed as the most momentous in the history of China's wheat trade. Wheat imports for 1931, writes Bruce A. Macdonald, assistant trade commissioner in Shanghai, in the forthcoming issue of the Commercial Intelligence Journal. The most striking feature was the amount of the total imports, which reached 15,000,000 tons, or 50,000,000 bushels. This was nearly eight times the imports of 1930, and four times those of the largest previous year, 1929. The value in gold was \$30,000,000, and it is safe to assume therefore that in 1931, wheat became one of the three most important of China's import commodities. It is also apparent that China has become one of the major wheat markets of the world, for the amount purchased by her is equal to one-fourth of Canada's total wheat exports in the year under review. The three chief supplying countries were Canada, the United States, and Australia, their respective percentage of the total volume of China's imports being 14.5, 18, and 65.3, as compared with 35, 20, and 45 per cent, respectively, in 1930.

Beef Sales Show Increase

Officially Branded Beef Has Assisted Greatly in Boosting Sales

An increase of 40 per cent, or 2,014,969 pounds in the volume of officially branded beef sold throughout Canada during the first four months of 1932 is shown in a report just issued by the Markets Intelligence Service of the Dominion Live Stock Branch. This is to say the least gratifying evidence of the soundness of the policy applied by the Federal Department of Agriculture to its Beef Grading Service. With really good quality in beef, positively marked for easy identification by the purchaser, beef is regaining in steady increasing measure its old place as a popular meat with Canadian housewives. It is interesting to note that officially branded beef is featured in the best retail stores in all our larger Canadian cities. In Montreal, for instance, there are at the present time over 125 retail stores featuring branded beef, and it is estimated that fully 30 per cent. of all the beef branded in Canada finds an outlet in the Montreal market.

B.C. Lumbermen Want Aid From Government

In Order To Build Up Business With China

British Columbians want to send lumber to China. To help break into the Chinese market, they want a subsidy from the Federal Government. Usually China buys 130,000 million feet of lumber from Manchuria and 100 million feet from Japan. Those two sources of supply are curtailed owing to war conditions in Manchuria and the Chinese policy of boycotting goods. Last year, China bought 314 million feet of lumber from the Pacific Coast. Of this huge amount, Canada only supplied 54 million feet. The United States Government grants a subsidy of \$4 per thousand feet on lumber shipped in United States boats. Between 1921 and 1928 the shipping lines are guaranteed a total of \$38,000,000 in subsidies. The British Columbia lumber men want a subsidy to help complete. They say shipping lines on the Atlantic Coast have been getting up to \$2,000,000 a year in aid from the Government, while Pacific Coast got only \$100,000.

Internally and Externally It Is Good.—The crowning property of Dr. Thomas' Eucalypti Oil is that it can be used internally for many complaints, as well as externally. For sore throat, croup, whooping cough, bronchitis, colds, and many other ailments it has qualities that are unsurpassed. A bottle of it costs only a few cents, and is no loss in always having it at hand.

A New Spring Song

"Spring has gone!" he whispered softly. And a gloom crept o'er his eyes. "Spring has gone!" The woman listened.

In her own eyes faint surprise. Through the window warming sunbeams. On the man's grim features shone. And the world was filled with romance.

And he whispered—"Spring has gone!" But he knew, and she believed him, And she sadly turned away. Forced a smile when he said louder: "But I'll mend your watch today!"

Wallpaper Of Glass

Wallpaper made of glass in a variety of colors and designs has been developed in Germany. The new wall covering will not fade, is perfectly sanitary and easily cleaned, and will wear indefinitely. The threads of spun glass have an attractively silky effect.

Schoolboy's essay: "The defendant's lawyer made a motion for a change of menu."

Food loses no nutritional value in canning, scientific experiments indicate.

Attended Summer School

Many Western Students Enroll At Queen's University, Kingston

Two British Columbia students, Miss Gertrude K. Reid, Kamloops, and G. W. Stubbs, Vancouver Island, are among the 340 pupils registered at the Queen's University summer school this year. A large number attending this season are from the western provinces. In fact, every province of the Dominion, with the exception of Nova Scotia and Prince Edward Island are represented at the summer school this year.

Professor W. H. Collins, of the University of Alberta, and Prof. W. O. Raymond, of Bishop's University, Lennoxville, Que., are two visiting professors this year. The former will lecture in history, while the latter will conduct classes in English. F. A. Werner, of the Ontario Department of Game and Fisheries, will also be on the summer school staff and will lecture in biology.

Soviet—U.S. Relations

Move Is Made To Restore Normal Relations Between Two Countries

Tentative and unofficial moves are being made to reopen the question of formal diplomatic relations between the United States and Soviet Russia. Acting alone and in a private capacity, Colonel Frederick Pope, New York Times industrialist, has presented to officials at Moscow a suggestion that the United States Government send an unofficial commissioner to the Soviet Union as a preliminary step in the negotiations for the establishment of normal relations between the two countries.

The Associated Press has reason to believe that his proposal was received with favor.

Larger Feet

Modern Women's Love Of Athletics and Out-Of-Door Life Is the Cause

Women's feet, according to men who sell shoes, have grown larger. The increase in size is attributed to the modern woman's love of athletic and out-of-door life. Size four, these men say, is still very popular, but it is amazing the number of women who wear sizes. Seven and eight are by no means the largest sizes of shoes they see. With the athletic figure, and the frequent use of more natural lasts and low heels which the sports field demands, women's feet have lengthened.

Buying and Prosperity

Wisconsin Co-Eds Launch Movement To End Depression

Wisconsin co-eds have launched a movement to help the world to buy its way back to prosperity.

More than 200 co-eds have pledged themselves to eat an extra slice of buttered bread daily, to buy an extra pair of silk stockings each week, and to buy a new frock and hat and to eat complete lunches.

The girls hope to enlist other organizations in the movement.

Life Hard On Venus

Life is hard on Venus. Venus Professor Philip Fox of the Adler Planetarium, Chicago, believes they are "tough customers." Talk about life on Venus is pure speculation," he said, "but from what we know of its climate, its inhabitants, if any, are indeed tough." A day on Venus is twenty earth days long. The night is the same.

Right Up To-Date

The new one-franc piece which France is coining shows how modern that country is. "Marianne," as the girl on the coin is called has been given a bob. Until this year she has long hair.

The average annual income of physicians in the United States, as revealed by an American Medical Association survey, is \$9,674.

An eel weighing 35 pounds was caught recently in New Zealand.

Sick from Heat

"Baby's Own Tablets are excellent for children's summer complaints," writes Mrs. E. C. Condon, Bradford, Ont. "Best of all children's remedies for summer complaints," writes Mrs. Geo. W. War, Toronto. "Equally effective for teething, fever, cold, constipation. Pleasant as candy—and absolutely SAFE. It's a package."

Dr. Williams' BABY'S OWN TABLETS

Dawson City Is Busy

Capital Of Yukon Is By No Means Dismal

Though gold may have "given up the ghost" in the Klondike of today, the vast Yukon and Dawson City, its capital, are by no means "dismal." Monsignor Emile Marie Bunco, Oblate Father, Bishop of Tazewell, and Apostolic Vicar to the Yukon and Prince Rupert, said in an interview: "We are proud of the Klondike's past and hopeful for its future. With a population today of approximately 1,000 inhabitants, including miners, settlers, Indians and hardy old prospectors, Dawson City is still a 'busy little village.'"

"Dawson City is beautiful in summer," the prelate said, "and for three months in the year it boasts of nightless days, the light shining 24 hours daily. During that time, games are numerous, and the city is replete with the most beautiful of flowers. And tourists come in large numbers, sailing by boat from Vancouver up the Pacific Coast to Skagway, where they board the White Pass Railway trains and climb the coast mountains range to White Horse, at the mouth of the Yukon River. They then continue by boat along the Yukon to Dawson City."

He mentioned the "Carlier Indians. They are so-called because of an old tradition, he explained. "When a tribal brave dies, his flesh is cremated. But his bones are gathered up in a little bag, and the widow carries them around with her, the bag slung over her shoulder and the bones there. In rattling out macabre hymns of the past."

British Exhibits Are Coming Via Churchill

Directorate Of Grain Show Learn Plans Being Worked Out

Exhibits of British manufactured goods to be shown at Regina next year during the World's Grain Exhibition and Conference and Regina exhibition will arrive via Churchill. Plans with this object in view are being worked out, members of the directorate board of the Regina Exhibition Association have learned.

A special committee representative of the exhibition association, the city council, the board of trade and the World's Grain Exhibition is at work making plans for the British trade exhibit and have received gratifying response from British manufacturers.

The exhibit will be housed in the present Confederation Building.

Using 'Planes In Stampede

Wild Horses To Be Rounded Up From Air

Klamath Falls, Ore., plans the mightiest wild horse drive—from the air. Three airplanes will dip low over the plateaus and passes, set the wild bands running, head them at the turns and finally stampede 2,000 of them. It is expected, into a gigantic trap corral in the lowlands. The finest stallions and mares, it is promised, will be allowed to escape again to the hills, but most of that vast catch will be kept for chicken feed. The automobile could replace the horse in man's hand, but not even the auto could chase him off the map. Only thunder-birds swooping down from the sky can bring extermination to these wild, free, liberty-loving mustangs—can stampede them into pony bait.—Christian Science Monitor.

Muskey Has Its Use

Possibility It May Be Manufactured Into Wall Board

Muskey, the moss-like substance that covers thousands of miles of Canada's treeless north country, has at last found a use. An inquiry recently received by the Board of Trade at The Pas, Manitoba, may lead to a trainload of muskey being shipped to Brampton, Ontario, for use in the manufacture of wall board.

Sitting in the midst of millions of tons of muskey, long believed valueless, officials of the board were amazed when they received the letter asking about the possibility of buying a dozen carloads or so. Negotiations are now under way for shipment and the Board of Trade is looking into the possibility of getting a factory to locate there and use the material.

Asthma Brings Misery, but Dr. J. D. Kellogg's Asthma Remedy will replace the misery with welcome relief. Inhaled as smoke or vapor it reaches the very innermost recesses of the bronchial passages and soothes them. Restriction passes and easy breathing returns. If you suffer as well how this remedy would help you as do thousands of grateful users, there would be a package in your home tonight. Try it.

Evidently Not Known

The case came before a London court only a matter of days ago when "with an income of nearly \$3,000 a year, had not a friend in the world." It cannot have been generally known that he had an income of nearly \$3,000 a year.

Reducing Coffee Surplus Slightly more than 263,000 sacks of coffee were destroyed by the Brazilian government in a recent week. This brings the total destroyed since policy of reducing the surplus production was adopted to 7,978,366 sacks.

More than 47,000 women are employed in United States banks.

Your Children will thrive on Christie's pure Arrowroots

For the tiniest babies... for older children... for growing boys and girls... there is nothing more delicious and nourishing than Christie's Arrowroots. No substitute is good enough.

Christie's Arrowroots

Miracle Recorded In Church Established For Centuries

Mosaic Panel Depicts Basket Of Bread And Two Fishes

A fourth-century church, built during the reign of the Emperor Constantine the Great, has been uncovered near Tiberius, on the way to Capernaum. This church commemorates the miracle of the loaves and fishes, performed by Jesus on the shores of the Sea of Galilee, and the actual stone said to have figured in the Gospel narrative as the boulder on which He stood has also been found in the centre of the church, where it presumably lay beneath an altar. Behind the stone a wonderfully designed mosaic panel was found depicting in vivid tones, red and yellow a basket several loaves of bread, and two fishes. Although buried beneath dust and rubble for about 1,600 years, and only a stone's-throw from the sea, the mosaic shows no signs of erosion, and the colors are well preserved.

Good Service For Citizens

Toronto Health Department Furnishes Tablets To Purify Water

A notice published in Toronto papers says that free tablets for the purification of water can be obtained from the city health department by any citizen. These tablets are recommended for those going on picnic, or on camping trips where there are chances of having to use water of questionable purity. The tablets will purify water and make it fit for drinking in a few minutes.

This is a useful service for any city to give its people. People who go away and who use water of which they know nothing at all are running risks, and a tablet which will eliminate this risk is a friendly thing and a good travelling companion.

Miller's Worm Powders are sweet and palatable to children, who show no hesitancy in taking them. They will certainly bring worm troubles to an end. They are a strengthening and stimulating medicine, correcting the disorders of digestion that the worms cause and imparting a healthy tone to the system most beneficial to development.

Game Fish In North

Transferring Speckled Trout Along Hudson Bay Railway Line

There is a possibility that game fish of the speckled trout variety, will be transported from the streams along the Hudson Bay Railway to the Clearwater Lake summer resort and other adjacent waters by airplane or tank cars, so the lakes may be stocked for sportmen.

E. H. Stevenson, inspector of fishing, who is in Churchill, is at present engaged in making a survey of the brooks along the bay line. It is his intention to pick out suitable places for the capture and keeping of fish until transferred to other waters.

Indian Brides Modern

Young ladies on the Indian reservations are rapidly adopting modern fashions. Recently on the Red Pheasant Reserve, at Prongue, Saskatchewan, Lilian Wuttunee and Gilbert Wuttunee were married. The bride was dressed for the occasion in the manner of the white people. She wore a veil and white silk dress and her hair was styled. Three maid-of-honor attended.

Plants Grown In Hyde Park

Plants grown for adorning the Royal Parks in London include 50,000 geraniums, 20,000 pansies, 10,000 stocks, and 10,000 antirrhinums. They are raised in glasshouses covering six acres in Hyde Park.

The English counterpart of the United States medal of honor is the Victoria Cross.

PERSONAL

SCOTTISH LADY AT PRESENT IN

"Canada, would like to take in charge one or more young ladies. Has experience in travel abroad, and with Canadian girls. Could act as companion to lady, in any part of Canada, or as travel companion. Has excellent testimonials both in Canada and in Britain. Would willingly give more information to interested party. Apply Box 60, Winnipeg Newspaper Office, 176 McDermott Ave., East, Winnipeg, Man.

Increased Resort To London Of Canadian Borrowers Shows New Financial Trend

Successful flotation of two provincial bond issues in the London market is accepted by New York bankers as a forerunner of increased resort by Canadian borrowers to the London money market.

"The new trend," says the paper, "is somewhat of a tribute to the London money market, which recovered its poise last December."

It remains the opinion of almost all competent authorities that the Canadian dollar will be eventually re-established on a parity with that of the United States, notwithstanding the present discount of nearly 13 per cent. on Montreal funds in New York. The close inter-relationships of United States and Canadian business interests, and the large aggregate of Canadian gold bonds, held in this country, are considered ample assurance of eventual exchange parity. Nor is it thought that such parity will be difficult to achieve or maintain in a normal world.

"It is accepted here that the Canadian borrowing in London had the tacit approval of the highest banking authorities in England."

This assumption is justified, since the effect on the exchanges accords with impressions prevalent here in regard to London financial policy. All exchange transactions between Montreal and London are mediated by New York. Canadian borrowing in London means, therefore, that additional pressure will be exerted to depress the British currency unit in terms of the United States dollar, while a favorable effect will be exerted on the Canadian unit in terms of the dollar.

"That London is averse to any substantial rise in sterling has been shown by the establishment of the stabilization fund. The effect of Canadian borrowing in London coincides with the operation of that fund, and it is therefore assumed that encouragement will be given the flotation of Canadian bond issues in London."

To Protect Industry

Ask For Stiffening Of "Empire-Content" Regulations In Britain

British Conservatives want a stiffening of the "Empire-Content" regulations which stipulate the percentage of Empire labor or materials that must be contained in goods entering under the Imperial preferences.

The central council of the National Union of Conservative Associations, meeting in London, with 500 delegates present, unanimously passed a resolution demanding the government take steps to amend the regulations, which at present call for an Empire content of 25 per cent.

The resolution complained that at present United States manufacturers are able to use Canada and the Irish Free State as corridors for the export into Britain of goods mainly of United States origin, thus evading the general duties and defeating the object for which they were imposed.

Educational Tour

Thirty British School Boys To Tour Canada This Summer

A two months' educational tour of Canada will be made by about 30 boys from British public schools when they are released from studies and examinations. Lord Nigel Douglas-Hamilton, member of the School Empire Tour Committee, London, England, and organizer of the party, reached Montreal on the Canadian Pacific liner, "Duchess of York," to complete the final details for their trip through Canada.

It is understood that the British schoolboys will spend about two months here and will cross Canada to the Pacific Coast.

Exports of beef from Alberta in 1931 totalled 100,000,000 pounds, according to the annual report of the Provincial Livestock Commissioner.

The United States imported 284,000 pounds of garlic last year.

"I believe all men are stupid."

"Oh, no. Some remain bachelors."

—Buen Humor, Madrid.

W. N. U. 1930

Sounds Reasonable

Establishing City Man On Farm Might Not Pay

A prominent citizen of Pennsylvania, realizing that unemployed city workers have no means to establish themselves in the country, proposes that the State should finance them in the purchase of farms, stock them with horses, cows, chickens and pigs, and supplying them with tools and seed. That kind of aid might be welcome to a genuine "back-to-the-land" who had been brought up in the city, but how can it benefit the man who has never known a life outside a city? He couldn't tell a chicken's tail a horse's head, or a pig's head, he is helpless when he sits at a milking stool at a cow's flank, he has the vaguest idea of none at all as to the proper feeding and care of swine. Even the comparatively simple procedure of keeping a flock of poultry or a good fettle is Greek to him. You might as well bring a discouraged farmer to the city and expect him to make a success of running a beauty-parlor or a high-class specialty shop.

Tariff Pleasuries

U.S. Attitude Puts An End To Possibility Of Negligent Trade

Colonel W. L. McGregor, president of the Canadian Chamber of Commerce, got a few things off his chest and on to the necks of the American Chamber of Commerce in convention assembled at San Francisco. Referring to tariff pleasuries between Canada and the United States, he says right out that the Americans started the game. The Smoot-Hawley Act is described as putting an end to fifty years of Canadian effort to trade with the United States. Furthermore, the newly threatened restrictions upon Canadian lumber and copper exports come in for rough handling. It is not much good trying to do business with a people who appear unwilling to buy from us, although they sell us one-quarter of their exports, quoth the colonel. In the classic phrase, he is not arguing with the Americans; he is just telling them—Montreal Star.

A CHARMING LITTLE MODEL THIS YOUNG, DAINTY AND VERSATILE

It can be carried out in a great many different fabrics. It all depends upon whether young daughter wishes to wear it for parties, "best" or everyday occasions.

For parties, tulle, crepe de chine or chiffon is dainty in pale blue, pink or daffodil yellow.

For simple "best," a crepe de chine print in light navy blue and white, cute idea as sketched. The yoke that merges into capelet sleeves is plain navy crepe. It's most practical.

Style No. 290 is designed for sizes 8, 10, 12 and 14 years. Size 8 requires 1 1/2 yards of 36-inch material with 1/2 yard of 36-inch contrasting.

Red and white polka-dotted dainty with plain white, lime green lining with yellow and orchid and white checked tulle gingham with plain orchid gingham are striking combinations, truly French.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Largest Vessels To Use Canal

New Welland Ship Canal Can Accommodate All Great Lakes Vessels

The new Welland Ship Canal, which links Lakes Erie and Ontario by overcoming the drop of 336 feet in the 27-mile span between the two, will be able this summer to accommodate the largest vessels that ply the Great Lakes. Some of these vessels have a length of over 400 feet, one, the largest on inland waters, the "Chicagoe," is 621 feet long. The "Chicagoe" has a length of 582 feet and a breadth of 60 feet with a gross register of 8,233 tons. The complete use of the new waterway is being brought about progressively. Although the locks are capable of accommodating vessels up to 520 feet in length, certain dredging has remained to be done to permit some of the longer craft to navigate curves with perfect safety.

The new Welland Ship Canal, one of the greatest engineering undertakings, has been built by the Canadian Government at a cost of about \$125,000,000. Though the lock gates on the new canal were opened in April 1930, it was not until April 1931 that the official opening took place. The construction of this waterway will enable the largest vessels to run from ports on the Great Lakes down the River St. Lawrence as far as Prescott, Ontario, where they will unload their cargoes for trans-shipment either by smaller vessels to Montreal through a series of canals which will overcome the stretches of the St. Lawrence that are not navigable to ordinary boats, or by the railways. Formerly the principal point of trans-shipment was Port Colborne on Lake Erie.

Weed Menace

Effective Method Of Securing A Clear Seed Crop

This is the time of the year when the rogues of the seed crop should be carefully watched—among the most troublesome of which are the weeds bladder campion, catch fly, couch grass, rib grass, ragweed, ox-eye Daisy and perennial sow thistle—and only by effective policing methods can the best quality of seed crop be secured. As the Dominion Seed Branch points out, growers should police their fields carefully and be prepared to resort to liberal roguing where necessary in order to ensure that their seed crop will be free from impurities which too often render otherwise good seed of no market value whatever. Roguing, or pulling weeds by hand, before they have gone to seed is the most effective method of making sure of securing a clean seed crop.

Important Medical Discovery

May Have Far-Reaching Effect On Treatment Of Diabetes

Publication by the Royal Society of England has just been made of the work of Dr. A. Bruce MacCallum, head of the University of Western Ontario Medical school, and of Dr. N. B. Laughton, in establishing the possibility of a duodenal hormone which is expected to have a far-reaching effect on the treatment of diabetes.

Working together at the university for several years, the two scientists have isolated an active principle from the membrane of the duodenal of rabbits, dogs, hogs, and cattle, which is distinct from insulin and secretin. This principle, supposedly a hormone, reduces blood sugar very quickly when injected under the skin or given by mouth.

Japanese Love Flowers

Chrysanthemum Is Queen and Cherry Blossom King Of All

The Japanese, who are traditionally a flower-loving people, claim that their islands produce 3,000 species of flowers. The white plum blossom heralds the coming of spring, then follow the cherry, wistaria, azalea, iris, peony, lotus, chrysanthemum and the camellia. The cherry is the monarch of all and it is celebrated by fetes and processions. The chrysanthemum is queen, and is on the crest of the Emperor. It has been cultivated for 2,500 years. The Japanese often enrich the roots of wistaria with rice wine. Their peonies are sometimes nine inches across, and the 80 varieties, when cared for after cutting, will last three weeks.

King's Telephone Listed

The New Yorker says: "One of our staff of telephone-book searchers is taking a much-needed vacation abroad. But his mind will get back to the job. He reports from London that he fingered the directory there for a few minutes and came upon one noteworthy item, King George V. 32 Manor Rd. Wallington 2162."

Family Serve Is Common

With the retirement of J. G. Hart, superintendent of the members' cloak-rooms in the English House of Commons, recently, he completed nearly 39 years' service there. His grandfather, grandmother, mother and aunt also served in various positions in Commons.

The green-house products of British Columbia have an annual value of nearly seven million dollars.

The flying tank is a new fighting machine.

GEORGE E. CARTER WINS PROMOTION

Succeeds George A. Walton as General Passenger Agent C.P.R.

George E. Carter, Assistant General Passenger Agent, Canadian Pacific Railway, is appointed General Passenger Agent Eastern Lines, with headquarters at Montreal, effective July 1st, according to an announcement by R. G. McNeill, Assistant Passenger Traffic Manager. He succeeds the late George A. Walton, who died on May 18. The position of General Passenger Agent has been held by Mr. Carter until now. This decision was reached in view of the need of economy during current business conditions, and the superior service of Assistant General Passenger Agent Carter.

Mr. Carter's promotion to one of the highest positions in the gift of the Passenger Department, follows a career already marked by steady advancement. Mr. Carter entered the service of the Company as a stenographer in the Passenger Department at Saint John, N.B., on September 25, 1914. Shortly thereafter he was called for Overseas Service, and was wounded on the Western front while serving with the Canadian Expeditionary Force. He subsequently became a member of the world famous Princess Patricia's, the character of his service with that unit winning him a commission in the Imperial Army, from which he afterwards transferred to the Canadian Corps.

Returning from Overseas at the close of the War, he re-entered the Passenger Department of the Canadian Pacific at Saint John, N.B., and steadily worked his way upward through the ranks. He was transferred to posts of increasing responsibility at Quebec, and in turn was made Chief Clerk in the New York and Montreal offices of the Passenger Department. Mr. Carter also made a special instructional trip to Europe in co-operation with the Canadian Pacific Steamships.

He was named District Passenger Agent at Saint John on December 10, 1928, and Assistant General Passenger Agent in Montreal on May 1st, 1930. He is a member of the Traffic Club of Montreal, and of the Kiwanis Club.

American Railways Hard Hit

Net Loss Of 76 Millions In First Four Months Of Year

A net loss of \$76,486,492 during the first four months of the current year was shown in the net income of the principal Class I steam railways of the country, according to a tabulation of the Interstate Commerce Commission based on reports of 164 Class I steam railways. This compares with a net income of \$959,810 for the corresponding period of last year. The net loss for April amounted to 20,687,727 compared with a net income of \$3,623,005 for that month in 1931.

Mouth Organ Sale Slumps

Strains of the mouth organ are only half as loud in the United States, Great Britain and France, as they used to be and that is why Germany's trade in this humble instrument of harmony has declined by half in a year. Strange to relate, however, the boys of Argentina are buying more of this kind of music.

African flappers are using lipstick.

CANADIAN-UNITED STATES PEACE PARK DEDICATED

These photographs were taken when the Waterton-Glacier International Peace Park was dedicated under authority of the Canadian Government and United States Congress as a monument to 117 years of enduring peace and good-will between the two nations. Sir Charles A. Mander of England delivered the dedicatory address at the colorful ceremony and he is seen at the top, centre, clapping hands of E. T. Scoyon (left), superintendent of Glacier National Park, and H. Knight (right), superintendent of Waterton Lakes National Park. The Peace park idea originated with the Rotary Club of Cardston, Alberta, and was sponsored by the Rotary Clubs of Canada and the United States. The lower photograph shows Chief Two Guns White Chief adopting Lady Mander into the Blackfoot tribe as Princess Shining Star Woman (Ko-Ski-Ki-Na-So-Ya-Kee), following the ceremonies of dedication.

Use Determines Variety

Varieties Of Corn Found To Be Especially Suited For Ensilage

The variety of corn to be planted under the present conditions is apparently determined by the purpose for which it is intended to use the crop. At the Federal Experimental Station, Swift Current, Sask., it has been found that even despite the prolonged drought corn produced fair yields of fodder, and that the smaller and earlier maturing Flint varieties give higher yields of dry matter than the later maturing Dents.

Where the crop is to be used for ensilage the Flint varieties are found to be unsatisfactory because of the difficulty experienced in harvesting them with a corn binder. These varieties usually have numerous suckers, and ears borne so close to the ground that they are frequently left on the field when the crop is harvested. Northwestern Dent and Minnesota 15 are recommended as varieties, specially suited for ensilage, while Gohu and Squaw are better suited for pasturing off with hogs or sheep.

Expedition Into North

May Attempt To Locate Rich Gold And Silver Properties

Captain James C. Critchell-Bullock, of Vancouver, companion of the late John Hornby during his wanderings in the sub-Arctic barrens of the North West Territories, may lead an expedition into the north in an attempt to locate rich gold, silver and radium properties.

"Hornby was the original discoverer of the Great Bear Lake radium area," Critchell-Bullock declares.

"During his wanderings in the barrens he made many other important discoveries, and before he turned to the search for most of his samples, his diaries and his maps."

One of these samples, assayed recently in Vancouver, shows values of \$136,000 in the ton in free gold, Captain Critchell-Bullock said.

Prepared For Emergency

Grave Ready For Lighthouse Keeper Taking Up Duties At Bahamas

When a lighthouse keeper takes up his duties in the lighthouse of one of the far-flung Bahamas, he finds a grave of solid rock awaiting him. He knows that the "right" is all-important, and another keeper could not take time off to dig him a grave. He also knows that because of the heat he will inhabit his final rock-hewn dwelling before sundown in the day he dies.

This novel "death interview" scheme was explained in an interview by E. H. Sawyer, resident engineer of the Imperial Lighthouse Service, on Furlough in Canada. He is in charge of the 12 Imperial Government lighthouses of the Bahamas.

Loud Speaker In Pillow

A pillow containing a radio loud speaker has been perfected by a Berlin firm. Perhaps "soft speaker" would better describe the device, for it is intended for hospitals, or for listening in without disturbance to others in the room. It looks like an ordinary sofa-pillow and can be tuned especially low.

A Berlin inventor has perfected a projector for throwing advertisements on mountain sides.

The United States and China produce the largest amount of poultry.

Eminent French Professor Declares There Is No Such Thing As The Gulf Stream

Requires Team Work

If Every Person Was Careful Fewer Of Adverse Effects Would Occur

Last year 571 people were killed by motor vehicles in Ontario, 341 people lost their lives by drowning and there were 204 deaths caused by falls.

That makes a total of 1,782 lives that were snuffed out by what might correctly be called preventable accidents, or what in plain speech would be called carelessness or recklessness, he called carelessness and consideration to this matter.

What that total will be this year, of course, remains in the lap of the gods, but judging by the fatalities already reported, it will contain a greater rather than a lesser number, unless people are prepared to give greater thought and consideration to this matter.

Schools are closed for the holidays and thousands of children are free, too many of them, to roam at their own sweet will. Will anything serious happen to them?

Surely it will, unless the parents and older people force into their minds the absolute necessity of being careful on the streets, on the roads, at the swimming hole and at other places dear to the heart of childhood.

But all the fatalities will not fall among the children, and very few will really be caused by them. One can rest assured of that fact.

What about the man or the woman who drives at thirty or forty miles an hour on the streets of a town, or at something approaching double that speed on the roads and highways leading to and from these towns? Are they trying to prevent accidents or have they even a thought of danger in their minds?

Contrary to a very general belief it isn't always the other fellow who is inviting an accident. Accidents have a way of happening in all places, not just in one, and there is no one cause for them, but many. If taking a little more time and being an hour on the streets of a town, or at something approaching double that speed on the roads and highways leading to and from these towns? Are they trying to prevent accidents or have they even a thought of danger in their minds?

It isn't always the other fellow who is inviting an accident. Accidents have a way of happening in all places, not just in one, and there is no one cause for them, but many.

'Twas a Great Water Event

Max King, Carman Melles

Win Wrigley Swim Events

Ronald Bergman, former sultan of Alberta swimmer, toppled from his throne in the Gull Lake Wrigley mile swim Wednesday last, when he only finished eighth, and Maxwell King of the West End Edmonton swimming club triumphed over a fast field to win the Wrigley trophy.

Although the men's event was fraught with surprises, the women's race was an easy victory for Carman Melles of the South Side club, last year's winner who led the race from the first and finished 100 yards in the lead to take the women's trophy.

Bill Madge, last year's speedboat title-holder, came away with the motorboat association silverware again this year when he won the final heat in a two-boat duel with George Clarke, Edmonton, after each had taken one preliminary. Phar Lap, the contender from Drumheller piloted by Bruce Reid, ran only in the first heat, and Vic Horner's Grad was entered only in the second contest, losing out on a water-logged engine.

The racing hum of the speeding engine, as the boats cut their agile swaths through the water, kept the onlookers on their toes, and the swirl of spray as the bullet-shaped boats swung the turns brought thrills to the audience.

Bill Madge, title-holder, won the first heat easily in spite of an engine that sputtered ominously as he sped along the last lap. In the second heat, Vic Horner, who replaced Bruce Reid's Phar Lap with Grad, led for the early part of the race, but a lap and a half from victory his engine sputtered into a wobble, sputtered and died. That left the field a close battle between Madge's Zip and George Clarke's Whiz, and after they had passed and repassed several times Clarke pulled away from Madge by several lengths to finish first.

Edmonton took all the honors, the fastest Calgary, R. Venables, finishing 12th in the mile swim, Edmonton speedboaters winning both heats, and the paddle-wheelers of the Voyageurs club taking 21 of 23 medals in the canoe events.

A crowd of nearly 5000 people watched the thrills and spills of the day, and the pier was packed to capacity with so many crowded on the diving platform that it capsize, and the racing float was knee-deep under water under the weight of contestants and onlookers. Weather played its part in making the regatta a success with a perfect day for swim and boat events lasting until waves rolled up as dusk approached. Overhead two aeroplanes from the Calgary Flying club dipped and soared, and the staccato beat of exhausts as the racing boats hammered an accompaniment to the excitement of an immense crowd.

Men, Irene Paribby, minister with out portfolio, started the opening ceremony with a few brief words of congratulation to the committee of the Gull Lake Aquatic club, and the Gull Lake Town council, which sponsored the regatta.

Charles Graham, president of the Alberta division of the Canadian Swimming association, then declared the meet formally opened, and spoke a word of thanks to the Wrigley company which donated the awards for the mile races.

In charge of regatta arrangements were G. T. Jackson, chairman; C. B. Haldin Jr., secretary; David Hay, chairman of the course committee; F. E. McLeod, chairman of the grounds committee; A. Bohler, chairman of the finance committee; starter, James Small, Calgary; referee, Jack Lewis, Edmonton; judges, Col. Daniel, Edmonton; Mrs. Ravilings, Edmonton; Mrs. Hewitt, Calgary; timers, W. Carleton, J. Smalley, Jr., Calgary; A. P. Methuen, P. B. Rose, Edmonton, judged at the turn.

The Calgary Navy Cadets furnished music during the program.

The big swim started at 4:00 o'clock sharp, with the 28 contestants taking to the water in an even break. Up to the turn it was anybody's battle, then Max King, swimming an easy, untiring stroke, began to pull away from the field. There were no sprints, all entrants taking their places slowly as the distance began to tell on the lesser swimmers.

Bonnie Bergman, 1931 Wrigley winner, wandered from his course and made a poor showing. Road Keith, south side club, last year's third, was the only veteran to regain his place, turning in a good swim to net third place.

Edward B. Donald of the east end club swam a nice race to lead Keith and take second, but he was unable to overhaul King. Jimmie Lett, a 16 year old novice from the east end club, turned in a fine performance for an untired swimmer to take fourth place.

Time for the race was poor, as the water was smooth and conditions perfect. But the winner could only set a 29-and-one fifth time.

Carman Melles of the south side club led some 50 yards at the turn and nearly 100 yard at the finish, coming only a minute behind the men's time, to win the women's cup and miniature. Elizabeth Fox and Nora Adair of the same club took second and third close together. Other entries were: Muriel Marshall, Jennie McCormack, of the south side club, and Marie L. Sharkey of the Calgary swimming club.

Paddlers of the Edmonton Voyage-

urs club took away almost all the medals. R. C. Brown, young Rocky Mountain House race winner, captured the 200-yard men's single trophy, and with his partner, John Tipton, took the men's doubles over the 400 yard course, as well as playing a paddle in the second canoe of the men's fours.

Jack Archibald took second men's single honors, with Bert Wilson third. Wilson, teamed with Garfield Barr, won the second medal in the men's doubles, and with Jean Moore won the mixed doubles first honors.

Joan Moore took the women's singles honors and in partnership with Isabel Ross won the women's doubles. Miss Ross also piloted an effective paddle in the craft piloted by Preston Giffen that took the mixed doubles win award.

Malcolm Kirkham won the "crab" race, with R. Hingley second and J. R. Patenaude third. In the men's fours, Tipton, Kirkham, Patenaude and Wilson won the winning craft, with Giffen, Barr, Brown and Hingley second. There were only two entries, so that when the second boat filled with water, the paddlers stopped to dump their boat, then continued to win the second medal.

Mixed fours found only one entry and Misses Moore and Ross, with Tipton and Giffen, had little difficulty in winning, although high waves made completion of the course a task in itself.

APPOINTED ACTING PRESIDENT FOR C.N.R.

S. J. HUNGERFORD

With the resignation of Sir Henry Thornton as Chairman and President of the Canadian National Railways, effective August 1, Mr. Hungerford, Operating Vice-President, has been appointed by the Board of Directors, as Acting President of the Company. Samuel J. Hungerford is one of Canada's best known railroad operating officers. His experience has ranged, in more than 45 years, from the humble position of machinist's apprentice, where he commenced in 1886, to that of Vice-President in Charge of Operation. Maintenance and Construction of Canada's largest railroad system, the Canadian National Railways.

Lord Hallahan, Secretary of State for War.

GREAT BRITAIN SEES BENNETT HERO OF HOUR

London, July 23--Prime Minister Bennett is the hero of the hour in Britain this week-end. His proposals for a larger free list and extended preferences are rapturously received by the tariff newspapers. Especially by those of Lords Rothermere and Beaverbrook, who greet him as a man who talks business from the start, who knows exactly what he wants and what he is prepared to give in return.

One enthusiastic editor, cabling from Ottawa, describes the spirit of Joseph Chamberlain looking down on the conference in full approval of the Canadian prime minister's "ringing speech."

However, another section of the press points out that while Bennett's offer is valuable, everything depends on what it means when boiled down to hard facts. Free Traders do not hesitate to say that "the whole principle of the offer seems to be vicious," from the British point of view because the power to use British tariffs as a bargaining weapon to bring down foreign tariff walls would disappear with its acceptance.

Satisfied Canadian Owners have established CHEVROLET LEADERSHIP!

A hundred thousand owners of low-priced cars throughout Canada were invited recently to tell what they thought was Chevrolet's most important story. Like a recurrent theme through the thousands of entries received was the conviction that Chevrolet leadership is based on the goodwill of the men and women who have tested the Chevrolet Six in millions of miles of driving.

The Chevrolet Six you buy today is a proved car; proved on the hard testing ground of a nation's roads and byways to the satisfaction of thousands of your fellow-Canadians. It has won acknowledgment today as the Great Canadian Value, just as this proud title has been won by each succeeding Chevrolet since the first of the line came out of the factory at Oshawa, seventeen years ago.

No wonder, then, that since January 1st, Canadians have purchased more Chevrolets than any other car, regardless of price. Wise motorists have said in no uncertain way that they want six-cylinder smoothness, free-wheeling, synchro-mesh, gear-shifting, Fisher-bodies, four parallel-mounted springs—and the other Chevrolet features without which no 1932 car can possibly be called complete!

Attention! Shorthorn Breeders

You are cordially invited to attend the annual Field Day and Picnic of the Alberta Shorthorn Breeders' Association, which is being held on Wednesday, August 10th. Guests will gather at the home of Peter Jamieson, (Rodeo Farm) four miles west of Alix on the Stettler-Lacombe highway at 10 a.m., and will leave at 11:15, motoring through to W. W. Sharpe's farm, four miles west and two miles north of Stettler. Bring a basket lunch with you. Tea, coffee, sugar and cream will be served at the farm. A splendid program has been arranged, and we hope to have the pleasure of the company of yourself, your family and friends.

Gull Lake is Booming

In spite of the depression, large crowds of people are enjoying the holiday season at Gull Lake. Every available camp-site is being used by visitors to this beautiful summer resort. Not for many years has there been so many tourists there. Tents, cabins and cabooses are being used on the various camp-grounds. On Sundays and holidays, motorists from far and near assemble there and enjoy picnics under ideal conditions. The last two weeks have been ideal for campers and bathers, and at times the water of the lake is almost lukewarm. The beach puts on a gala appearance on holidays and Sundays, with hundreds of people enjoying the opportunity to get a nice sun-bath or to take a refreshing swim.

The stores and dairies are doing a big business and the dances are being well patronized.

L. Belling, whose store and picnic grounds are located at the west end of Aspen Beach reports a bumper season this year, and says that people from all over Alberta, and many from other provinces have registered at his camp, and went away greatly pleased with Gull Lake. Anyone who has not yet visited Ebeling's Lake-side camp, should do so—it is really beautiful.

Hugh Gunn, formerly of Bentley, is now operating the Kandy Kitchen, which is located about half a mile west of the government picnic grounds. Mr. Gunn's first year in business at Gull Lake, and he says he is doing a big business. He specializes in candy, which he manufactures right there. You should try some of his candy—it is good. He also has a full stock of groceries, confectionery, ice cream, etc.

Tom Lorimer's Cottage Store is getting a large amount of patronage. He has a full line of groceries, fruits, in fact everything for the camper. He also does tire repairing, and minor motor repairs. Just take your tire troubles to Tom and he will fix you up. Groceries from his store will be delivered anywhere on the beach.

Mr. Leban Sandbrook is back at his old stand, and doing a big business. His beautiful ice cream parlour is being well patronized and his concrete tennis court is a great attraction. His tourist rooms, which may be rented at a very nominal price are occupied almost every night, and his whole establishment is running full blast. Call around and visit "The Cozy."

The old reliable John Hug, who has looked after the dairy needs of the beachers for many years is there as usual, and reports everything going fine. He guarantees service, and you can depend upon him. He distributes large quantities of milk and cream every morning and evening to him for milk, cream, vegetables or dressed poultry.

The Aspen Beach Grocery, which is operated by Otto Woelherl has everything you need in the line of groceries, ice cream, tobacco, wood, ice and fresh vegetables. Located next to the government park, this place is very handy and convenient, and ice is delivered anywhere on the beach and you will be pleased with the courteous service.

George Jenkins' modern dairy is there to cater to your wants. You are assured of sweet, pure milk and cream from this dairy. Mr. Jenkins also handles wood and ice, dressed poultry and vegetables. When at the lake, call at Jenkins' Dairy and make arrangements for your dairy needs. Mr. Jenkins invites you to inspect his place; you will find it up-to-date and clean as a pin.

The Tea-Cup Inn, which is situated right on the main road from Lacombe near (McDonald Hotel) is busy night and day. Lunches or full course meals are served here as well as afternoon tea. Visit the Tea-Cup Inn and have your fortune told.

Tommy's Cafe is doing well, and the meals and lunches served are good and the price reasonable. Visit this little cafe and try their coffee; you will enjoy it. The McDonald Hotel, on the corner is open for business. Housekeeping suites or tourist rooms can be rented most reasonably, and there is a dining room in connection. The rooms are clean and comfortable and nicely furnished. You will enjoy a visit at this place.

George Fernie's establishment is running full swing. His store is doing a nice business, and his dance hall is attracting large crowds. A poppy six-piece orchestra plays at his popular dance hall on Mondays, Wednesdays and Saturdays. Mr. Fernie is also prepared to deliver wood, ice and everything else you need to make holiday more convenient.

LACOMBE'S NEW FLOUR MILL
Thomas Norrie, an old timer of Lacombe, having been in business here some thirty-three years ago, and who for many years has been operating a flour mill in Stettler, has commenced the erection of a mill here on the site of the Danmer mill, destroyed by fire some years ago. Mr. Norrie is putting in an up-to-date plant, and to start, his capacity will be 40 bbls. per day. In addition to manufacturing flour, he is putting in a chocolate mill, for the production of feed of all kinds. The building is rapidly nearing completion and will be in operation before the crop is harvested.

Rev. D. K. Allen of Westlock, will conduct services at St. Andrew's Church on Sunday, July 31st.

Field Day at The Farm

CEREAL CROPS FIELD DAY
Dominion Experimental Station
Lacombe, Alberta
Tuesday and Wednesday,
August 16 and 17

The annual Cereal Crops Field Days will be held at the Dominion Experimental Station, Lacombe, on Tuesday and Wednesday, August 16 and 17.

The programme will start at noon August 16th with visitors pertaining to the Canadian Seed Growers' Association. The different steps in the production of Elite and Certified Seed at the Experimental Station will be reviewed while the plots grown from samples of wheat, oats and barley submitted to the central office of the Canadian Seed Growers' Association at Ottawa for verification as Elite Stock Seed will be studied. A general meeting of the Alberta section of the Canadian Seed Growers' Association will begin at four o'clock in the afternoon, when matters of interest to seed growers of the province will be brought up for discussion.

The programme of the second day, Wednesday, August 17th, will be more general in nature, and will include comparisons of different varieties of cereals, and a comparison of thirty plots of grain grown from samples taken from export cargoes of thirty outgoing steamers with 1200 samples of samples taken in Central Alberta.

The experimental work with cereals is of vital importance to all those interested in the production and marketing of grain. Be sure and come and bring your friends. Coffee and sandwiches will be supplied for those who bring their lunches.

REV. M. L. PEARSON WEDS
VERA E. PEERS OF PASADENA

—Pasadena Newspaper.

Of particular interest to the Presbyterian church congregation of Orange, also to the bridegroom's hosts of admiring friends in this community and throughout Orange county, was the marriage at Pasadena yesterday of Rev. M. L. Pearson, former Orange pastor, and Miss Vera Elizabeth Peers, a resident of Pasadena for the last three years.

The wedding ceremony took place at five o'clock at the bride's home at 365 Elizabeth street, Pasadena, with Dr. Robert Burr McAlister, pastor of the local Presbyterian church, and successor to the Rev. Mr. Pearson, reading the marriage service in the presence of a small group of relatives and friends of the couple.

Yesterday was of double importance to the Rev. Mr. Pearson, as it marked not only his wedding day, but his birthday as well.

The bride, who chose for her wedding dress a becoming model of apricot chiffon which enhanced the exquisite beauty of her bridal bouquet, was unattended.

Following a month's honeymoon, which they will spend in Santa Monica, the Rev. Mr. Pearson and his bride will establish their home on his orange ranch in Pasadena.

Rev. M. L. Pearson is a daughter of Mrs. Elizabeth Peers of Lacombe, Alberta and her father served for many years as a Baptist pastor. She was born in Detroit, Mich., and has passed the greater part of her life in Lacombe.

AT THE AVALON
This Week End
"The Rainbow Trail"

Telling a swift, action filled and wholesome tale of high adventure and romance of the wide open spaces, Zane Grey's "The Rainbow Trail," with George O'Brien in the leading role, which opens tonight at the Avalon Theatre, recalls the days of the old West, and glories that are now past. This is the much heralded film that was photographed in the depths of the Grand Canyon and which won some of the finest scenic shots ever brought to the screen. In addition to O'Brien, the large cast includes, Cecelia Parker in the leading feminine part, Minna Gombell, Roscoe Ates, James Kirkwood and J. M. Kerrigan.

COMING:
"Charlie Chan's Chance," Aug. 4, 5 and 6.
"One Hour With You," Aug. 11, 12 and 13.

DEATH OF JAMES EADIE
His many friends in the district, of which he was one of the leading farmers, will be grieved to learn of the death of James Eadie which occurred suddenly at the home of his son John, at Rimby on Saturday. Deceased was 89 years old at the time of his demise, and had been in his usual good health up to within a few days of his death. He leaves to mourn two sons, John of Rimby, and Clarence of Lacombe, besides many relatives in the Old Country.

The funeral was held on Monday afternoon, service being held at the home of his son at Rimby, interment being made in Lacombe cemetery.

A DISGUSTING RECORD
Rev. Duncan McDougall gave a resume of the life of J. J. Maloney (you know, the Ex-Cleric) in the Rex Theatre on Monday night. There was quite a turnout and from the charges made by Mr. McDougall, the said J. J. Maloney is no doubt of roses. The disclosures were of such a disgusting nature that The Western

Minneapolis Moline Says,

Have cash by buying now—Drastic Price reductions on many Machines—Easily understood, most liberal 77 cent Wheat plan—Buy and save on the extra Quality M-M Tractors, Threshers, Combines, Implements. Terms to suit today's conditions.

FARMERS TO PROTECT HOMES FROM SEIZURE BY FORCE IF NEEDED

Saskatoon, July 26.—Farmers of Saskatchewan will take active steps to defend their farms and homes against tax sales and evictions; a wave of indignation swept over the convention of the United Farmers of Canada, Saskatchewan section, here today as speakers told the delegates they could look for wholesale seizures and evictions during the coming autumn.

By an unanimous vote the convention passed a resolution declaring: "Whereas the economic conditions of agriculture in Saskatchewan have reached a position where it is necessary for this organization, the United Farmers of Canada, Saskatchewan section, to take a definite stand for the protection of the homes of the people: "Therefore be it resolved that every local lodge should constitute a defense unit for the protection of our homes against seizures, evictions and forced sales and co-operate with other organizations, with this end in view."

Passing of the resolution climaxed a debate in which embattled farmers declared the banks were forcing the hands of municipalities and driving them to make forced collection of taxes. Throughout it was stressed the farmers had no desire to evade payment of taxes when they had the means to pay. They objected to being forced out of their homes because they had no money to pay through no fault of their own. "We don't want anybody to get shot," said Joseph Phelps of Wilkie, "we want to keep within the law but the law is always on the other side."

RARE SPECIES OF DUCK SEEN AT GULL LAKE

Believed to have been a wood duck, one of the rarest species on the prairies, a mother and a brood of twelve young were seen at Gull Lake on July 2 by R. W. Ward, Canadian Bakeries manager and past president of the Calgary Conservative Assn., the Globe learned.

"It was one of the most interesting sights I have ever seen," Mr. Ward said. The first indication Mr. Ward had of the presence of the mother and her brood was when he heard them coming out of a tree about 30 feet distant from the porch on which he was sitting.

The mother showed her young ones how to alight, before any of them would attempt the jump from the perch about five feet from ground. The nest had been built in the hollow of a dead tree. The twelve young birds had finally jumped and fluttered to the ground, Mr. Ward said. The mother then led them proudly to the water, where they had their first taste of their natural element.

The male duck was not seen by Mr. Ward. The male is the brightest colored and most beautiful duck in America, and perhaps in the world, naturalists say. The only duck which can approach it for beauty is the Mandarin duck of China. The bird is rarely seen in Canada, except in the East, or in Southern B.C.

Bentley News

Mr. J. Carritt motored to Edmonton on Monday.

Mr. W. Pringle and family attended the exhibition at Edmonton last week.

Mrs. Page of the co-op. staff has returned from her holidays and has resumed her duties at the store. Work is well under way at the new community hospital. The basement and cement work being all finished. The framework is well up, and work is going ahead rapidly. A crew of over 5 men being kept busy.

Many of the Bentley golf stars journeyed to Lacombe over the week end to play the course there.

At a fast ball game played in Bentley on Tuesday night, the Clive team came out second best, the score being Bentley 5, Clive 3. The game was a thriller from start to finish and the many fans present saw a real exhibition of baseball as it should be played.

Mr. and Mrs. Packer, of Calgary, are visiting at the home of Mr. and Mrs. J. Damron, in Bentley.

The Morningside ball team will play at Bentley, on Saturday night. Everybody come and support the home team.

This will be a real game. Glen Williams, while swimming on Sunday afternoon in Sylvan Lake, became in keen distress and was rescued by a party headed by Rev. Dean Robinson, of Calgary. He was unconscious when brought to the shore. Respiratory measures revived him. Rev. Dean Robinson has been personally thanked by the boy's father for his brave act.

O. E. TISDALE TAKEN BY DEATH

O. E. Tisdale, who paid his first visit to Calgary in 1883 when the first train arrived at what was to be this city, died suddenly Thursday afternoon at the residence of his daughter, Mrs. P. W. Smith, at Red Deer.

He joined the I.O.O.F. Lodge, North Star No. 2, at Winnipeg on May 4, 1882. On coming to Calgary in 1901, he became affiliated with the Alberta Lodge No. 1, and held the position as secretary for a number of years. In 1905 he was appointed the first grand secretary of the grand lodge of Alberta, which position he held until the time of his death. Mr. Tisdale held the position of grand master during the year 1911.

On his 1883 trip Mr. Tisdale paid a visit to what is now Rocky Mountain House.

He is survived by a daughter, Mrs. Smith; a son, Edward, of Philadelphia; a sister, Mrs. J. G. Monlaur, of Calgary, and a sister, Miss Tisdale, of Simco, Ontario.

BLACKFALDS NEWS
A very disastrous hail storm struck Blackfalds and district, late Monday afternoon, destroying crops and gardens all the way from 25 to 100 p.m. being particularly heavy from a point three miles west and centering in its sweep along the Blindman River. The hailstones were very large and the damage would have been much more had there been a sweep of wind. Many windows were broken. The storm was several miles in width.

Miss Melba Steacy, of Calgary, is

"DON'T BE ROBBED OF YOUTH!"

SAYS RALPH GRAVES

"Here in Hollywood," Ralph Graves, scenario writer, says, "women don't use birthdays as an excuse for growing old. They seem to know the secret of becoming more and more alluring year after year."

"The screen and stage stars usually keep that lovely irresistible glow that youngsters have. And lots of other women, these days, seem to have learned their complexion secret."

"Above all, guard complexion beauty," the stars will advise you. "The gentle, soothing Lux Toilet Soap regularly—as we do!"

Across the world over, use fragrant, delicately white Lux Toilet Soap to keep their complexions always exquisite. In Hollywood, where 600 of the 604 important actresses are devoted to it, this fine soap is official in the great film studios.

You are sure to love the way it cares for your skin! The carers of dollar-a-cake French soap—just 10c!

THE HOUSE OF DREAMS-COME-TRUE

—BY—
MARGARET FEELER
"The Splendid Fable," The Herald of the Pacific
Hodder & Stoughton, Ltd., London.

CHAPTER XXV.

Arranged by Telephone

The visit to London, if it had not been profligate in the results which Lady Anne had hoped for, had at least accomplished certain things.

It had acted as a brake upon the swiftly-turning wheels of two lives precariously poised at the top of that steep hill of which the level of the sea was the end, but which every sure lead to heartbreak and disaster, and had sufficed, as Jean had suggested that it might, to restore Nick to a more normal and temperate state of mind.

He and Claire had passed a long hour alone together the day after his return to Staple, and now that the first violent reaction, the first instinctive impulse of unbearable revolt from Sir Adrian's spying and brutality had spent itself, they had agreed to shoulder once more the burden Fate had laid upon them, to fight on again, just holding fast to the simple knowledge of their love for one another and leaving the ultimate issue to that great, unfathomable Player who "bitter and thither moves, and mates, and slays," not with the shadowed vision of our finite eyes but with the insight of eternity.

Jean had seen them coming hand in hand through the cool green glades of the wood where the great decision had been taken, and something in the two young, stern-set faces brought a sudden lump into her throat. She turned swiftly aside, avoiding a meeting, feeling as though here was a ground upon which not even so close a friend as she could tread without violation.

To Jean herself the week in London had brought a certain new tranquility of spirit. Quite naturally and without effort, thanks to Lady Anne's skilful stage-management—the blame and blame had been constantly in each other's company, and with the word "Beloved" murmuring in her heart like some tender undertone of melody, the hours they had shared together were no longer a mingled ecstasy and pain, marred by torturing doubts and fears, but held once more the old magic of that wonder-day at Montevan.

Somewhat the dividing line did not seem to matter very much, now that she was sure that Blaise, on his side of it, was loving her just as she, on hers, loved him. Indeed, at this stage Jean made no very great demands on life. After the agony of uncertainty of the last few months, the calm surety that Blaise loved her seemed happiness enough.

Other sharp edges of existence, too, had smoothed themselves down—as sharp edges have a knack of doing if you wait long enough. Burke seemed

to have accepted her last answer as final, and now spared her the effort of contending further with his tempestuous love-making, so that she felt able to continue her friendship with Judith, and her consequent visits to Willow Ferry, with as little "guilt" as though the episode at the "Honey-mooners' Inn" had never taken place. She even began to believe that Burke was genuinely slightly-remorseful for his behaviour on that particular occasion.

Apparently he had not made a complaint of his sister over the matter, for it was without the least indication of a back thought of any kind that she approached Jean on the subject of spending a few days with herself and Geoffrey at their bungalow on the Moor.

"Geoff and I are going for a week's blow on Dartmoor, just by way of a 'pick-me-up.' Come with us, Jean! It will do you good after stuffy old London—how the cobwebs away!"

But here, at least, Jean felt that discretion was the better part of valour. It was true that Burke appeared fairly amenable to reason just at present, but in the informal companionship of daily life in a moorland bungalow it was more than probable that he would become less manageable. And she did not desire for a repetition of that scene in the inn parlour.

Therefore, although the Moor, with its great stretches of gold and purple, its fragrant, heathery breath and its enfolding silences, appeared to her in a way in which nothing else on earth seemed quick to appeal, pulling at her heartstrings almost as the nostalgia for home and country pulls at the heartstrings of a wanderer, she returned a regretful negative to Judith's invitation. Burke and Jean, Craig packed up and departed to Three Fir Bungalow without her, and life at Staple resumed the even tenor of its way.

The weather was glorious, the long, hot summer days melting into balmy nights when the hills and dales and which the old house was set were bathed in moonlight mystery—transmuted into a wonderland of phantasy, overgrown with shadow where undreamed-of dragons lurked, lambent with opalescent fields of splendour whence sprang the phantoms of half-visioned palaces or the battlemented walls of some ethereal fairy castle.

More than once Jean's thoughts turned wistfully towards the Moor which she had so longed to see by moonlight—Judith's "holy of holies" that God must have made for his "spirits"—and she felt disposed to blame herself for the robust attack of caution which had impelled her to refuse the invitation to the bungalow.

"One loses half the best things in life by being afraid," she told herself petulantly. "And a second chance to take them doesn't come!"

She felt almost tempted to write to Judith and propose that she should join her at the bungalow for a few days after all if she still had room for her. And then, as is often the way of things just when we are contemplating taking the management of affairs into our own hands, the second chance offered itself without any directing on Jean's part.

The telephone bell rang, and Jean, who was expecting an answer to an important message she had "phoned" through on Lady Anne's behalf, hastened to answer it. Very much to her surprise she found that it was Burke who was speaking at the other end of the wire.

"Is that you, Geoffrey?" she exclaimed in astonishment. "I didn't know your bungalow was on the phone. I thought you were miles away from anywhere!"

"It isn't. And we are," came back Burke's voice. From a certain quality in his tone she knew he was joking. "I'm in Okempton, phoning from a pal's house. I've a message for you from Judy."

"Ye-es?" intoned Jean enquiringly.

"She wants you to come up to-morrow, just for one night! It'll be a full moon and she says you have a hankering to see the Moor by moonlight. Have you?"

"Yes, oh yes!"—with enthusiasm.

"Thought so. It certainly does look topping. Quite worth seeing. Well, look here, Judy's not a party of friends, down from town, who are coming over to us from the South Devon side—going to drive up and stay the night, and the idea is to do a moonlight scramble up on to the top of one of the tors after supper."

"Oh! How heavenly!" she said, ecstatically, from Jean.

"How what?"

"Heavenly. Heavenly—!—with increasing emphasis. 'Can't you hear?' 'Oh, heavenly—yes, I hear. Yes, it would be rather—' if you can't hear."

Even through the 'phone Burke's voice conveyed something of that up-setting fiery ardour of his.

"I won't come—unless you promise to behave," said Jean warningly.

Buttling over with pleasure at the prospect unfolded by the invitation, she found it a little difficult to infuse a befitting sternness into her tones.

"Do I need to take fresh vows?" came back Burke's answer, spoken rather gravely. "I made you a promise that day—when you came back from Dartmoor. I'll keep that."

"I'll never kiss you again till you give me your lips yourself."

The words of the promise rushed vividly into Jean's mind, and now that steady voice through the 'phone uttering its quiet endorsement of the as-

urance given, made her feel suddenly ashamed of her suspicion.

"Very well, I'll come then," she said hastily. "How shall I get to you?"

"It's all planned, because we thought—at least we hoped—you'd come. If you'll come down to the bungalow by the three o'clock train from Combe Earle, I'll meet you there with the car and drive you up to the bungalow. Judy is going to drive into Newton Abbot early, to do some marketing, and afterwards she'll lunch with her London people—the Holbourns. Then they'll all come up together in the afternoon."

(To Be Continued.)

Talk Less and Do More

Chinese Government's Advice Good For Other Countries

China should take to the woods. That is the firm conviction of Yen Hui-shan, Shanghai's "model Governor." He is not in the generally accepted sense of the term. Rather would he have it take kindly to the woods, by plant trees and the people devote their energies to what is beautiful and useful. The habit of talking, he believes, has gone to excess, and the habit of doing is suffering from lack of cultivation. The advice is good. Why confine it to China? It could be of service to many other parts of the world—Christian Science Monitor.

Acquiring More Land

Hutterites Pay \$150,000 Cash For Farms Near Lethbridge

Rockport, Hutterite Colony, one of the strongest and most prosperous in Alberta, has expended \$150,000 for the purchase of 5,500 acres of farm land, four miles southeast of Stirling in Southern Alberta.

The colony purchased for cash the R. E. Patterson ranch and the Rich Ranching Company farm adjoining their growing crops. This was the largest cash land deal in the Lethbridge district for more than a year and the largest in Alberta this year.

Too Much Lipstick

Lady Passfield Criticizes Painted Lips In Russia

Lady Passfield, better known as Beatrice Webb, 70-year-old British Socialist and Economist, came back from an eight weeks' tour of the Soviet Union convinced that the women of Russia use too much lipstick. She wants the Communist party to issue a decree forbidding painted lips.

"The use of rouge, powder and lipstick," she said, "is a characteristic of a decadent capitalist civilization; a barbaric fashion, practised by primitive races."

An Imposing Monument

Prince Of Wales Will Dedicate War Memorial In France

One of the most imposing war memorials on French soil is that which is to be dedicated by the Prince of Wales at Thiepval, on the Somme, next March. This monument, which is nearing completion, will be composed of triumphal arches 140 feet high, and only five feet less in breadth. On the pillars will appear the engraved names of 73,367 British officers, N.C.O.'s and men.

Carelessness Means Loss

One of the greatest contributions to the enormous losses that can be attributed to waste is carelessness production. Poultry and egg production, up to recent years, on ever so many farms was a haphazard, carelessly managed enterprise. Practices followed in former years became established in the minds of producers until they were practically a habit.

Record Still Intact

The Wilson brothers arrived and the old man in the railway carriage had been staring at the bottle in the hand of a convivial fellow-passenger. "I am seventy years of age," he said, "and I have never tasted a drop of whiskey!"

"Dinna worry yerself," returned the other, "you're no' goin' to start now."

Librarians Know

A writer in Colliers says ten books on a shelf may be arranged in 3,628,000 different ways, but many a librarian faced with the task of putting such books to rights several times a day, will be inclined to think the number has been underestimated.

Only On Map

With all the present talk of communism, it might be well to point out that although, on all maps of the world, the British Empire is colored red, there is very little of that spirit found in any part of the Empire.

Dry Also Made of Cellulose

As is almost irresistible to trout.

Had Not Forgotten Training

Pastor Of Toronto Church Pursued And Caught Thief

When a dignified clergyman, no longer in the hey-day of youth, or a sedate and aging member of the professions, confronted by an emergency, shakes off his years and shows that his college athletic training has not been forgotten, all the world applauds. This week, Rev. Father Edward Kelly, pastor of St. Clare's Church, Toronto, proved that "the cloth" did not interfere with his sprinting when a suspected thief was to be caught.

When the burglar alarm connected to the church safe clanged its warning that something was wrong Father Kelly sprang into action. A man was seen running from the church, then speeding swiftly along the street. The pastor, the pastor and a neighbor joined to chase the thief along back lanes and over fences. The police were notified, but when they arrived on the scene Father Kelly and his companions had overtaken and captured their quarry.

Germany Grows Own Food

For First Time Since the War, Will Be Independent of Other Countries

Food minister Friedrich von Braun announced that Germany, for the first time since the war, was independent of other countries regarding food. This season, he said, millers would be required to use home-grown wheat for 97 per cent of their flour.

German crops were estimated to be in excess of the average, while enough meat, potatoes and fats had been produced to feed the whole population.

There was no necessity, Baron von Braun said, for farmers to throw their bumper crops immediately on the market, because the government had taken measures to prevent creditors from pressing farmers for their debts.

Hint For The Cook

Expert Says "Pinch" Should Be Weighed For Best Results

Many a tasty dish would be just a little tastier, and many a sad stew would be just a little less if cooks would make some effort to standardize their "pinch." Said Max Werder, assistant vice-president of the National Association in a recent issue of *Home Economics*, Mr. Werder advises all cooks to measure their fingers and weigh their "pinch" capacity, so that a "pinch of salt" or a "small pinch of cayenne pepper" will have the same meaning. He says the former amount should be a quarter of an ounce and the latter a sixteenth of an ounce.

Province Of A Newspaper

Is To Report Actual Happenings Without Any Prejudice

It would be comical, were it not somewhat pathetic, the way newspaper offices are besieged by their friends, urging them to "roast" this and "toast" that, and to "take it and that" as it comes. It is to be hoped that in the city or county, these friends actually appear to believe that it is the newspaper's business to handle all these affairs.

But a self-respecting newspaper, when ready and willing to carry all reasonable responsibility, must tell its readers that they too have a responsibility.

A self-respecting newspaper tries to report the news of what actually happens, not what it might wish the happened. The relation of a self-respecting newspaper to the general public is not always understood. It is the duty of a newspaper to be in a position to support any good act and criticize any bad act of public policy.

This relationship cannot exist unless the newspaper is honest and fair. It is the only policy for a newspaper.

If objectors don't like the way things are going, they should qualify as voters, and then raise Cain about it.—Kitchener Record.

The Line Is Busy

But Chinese Have Most Polite Way Of Saying So

In China, when a subscriber rings up the telephone exchange the operator asks: "What number does the subscriber desire?" After a short silence the exchange resumes, "Will the honorable person graciously forgive the inadequacy of the insignificant service and permit this humble slave of the wire to inform him that the never-to-be-sufficiently censured line is engaged?"

Treat For Dad

Arthur, aged seven, had carefully "sneaked out all the soft pieces of his onion toast, neatly piling the crumbs on the edge of his plate.

"When I was a little boy," said Arthur reprovingly, "I always ate my crumbs."

"Did you like them?" asked Arthur.

"Of course I did," lied the father, glibly.

"You may have these," replied his son, graciously.

"Fritz, your essay on 'My Mother' was just the same as your brother's."

"Yes, sir, we have the same mother."

Overcoming Danger Of Lightning To Airplanes

Process Known As "Bonding" Has Been Proved Effective

British aeronautical engineers have succeeded in overcoming danger to aircraft and passengers from lightning to such an extent that a plane may be struck while in flight and remain sufficiently undamaged to continue its journey.

A process known as "bonding," in which all metal parts of the machine are connected into a continuous conductor prevent heavy charges of static electricity, such as are picked up in storm clouds, from blowing the plane apart.

"Horatius," an Imperial Airways airplane, was recently struck by lightning while flying over Kent on her way to Paris. Although some of the windows were blown out, no occupant was hurt and the pilot was able to turn back to London and transfer his passengers to another plane which took them at once to their destination.

Punctuality Is Amazing

Birds and Fish Seem To Have Extraordinary Time Sense

Some birds certainly have a sense of time. Observations made at Barton Abbey, England, in the month of June prove that the lark is definitely the first to sing in the morning. This at two minutes after three. Next comes the thrush, third the sedge warbler, fourth the blackbird. Then in order the reed bunting, robin, cuckoo, willow-wren, rook and garden warbler. The whole list is too long to give, but the same order was kept faithfully, morning after morning, ending with the tree creeper which did not sound its note until four thirty-seven.

Great schools of a delicious little fish arrive yearly off the coasts of Samoa on the same day in the same month, with such regularity that, from time to time out of mind, the day has been set apart by the natives as a holiday and a feast day. The shoals take twenty-four hours in passing, then they are not seen again until the same day the following year. There is no explanation of the amazing punctuality of their yearly visit.

Little Helps For This Week

"Great peace have they which love thy law."—Psalm cxxx. 165.

Dear Lord and God, incline Thine ear unto my call; O grant me that in all, This will of mine May still be one with Thine!

Teach me to answer still, What's my lot may be, To all Thou sendest me Of good or ill, All glories as God will.

Alice Williams.

Demand For Binder Twice

Eastern Factory To Increase Plant Capacity By 50 Per Cent

Anticipating increased demand for binder twice due to a predicted heavy wheat crop this year in Canada, the Plymouth Cordage Company of Wexford, has installed new machinery to increase plant capacity by 50 per cent, and started a night shift. Employment for 200 additional men will be given.

Know Surgical Technique

First evidence that prehistoric natives of British Columbia knew the surgical technique of trephining

A piece of bone out of the skull—was found recently when a skull bearing marks of this operation was unearthed.

A writer asks how it is that some women carry their age so well. We can only suppose that they lighten the burden by dropping a few years now and then.

DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women vote dust cloths a nuisance to use and to wash

MUCH PREFER APPLEFORD WONDER PAPER

With so much inventive thought being given to eliminating unnecessary housework, it is only natural that a worthwhile substitute for the dusty dust cloth should be sought.

Now It Has Been Found!

Appleford Wonder Paper which actually dusts—sifts clean—sifts polished—is receiving a hearty welcome from Canadian women who detest dust cloths and all they stand for.

Wonder Paper is made from clean rag and soft paper pulp, thoroughly impregnated with a high-grade furniture polish, and absorbs dirt instead of spreading it.

Appleford Wonder Paper in handy-size package, twenty-five sheets, each as large as a dust cloth. You merely crumple a sheet into a soft wad, and go over the surfaces requiring attention.

You'll be amazed at the quick and lasting finish Wonder Paper gives. When one side is worn and soiled, simply turn the Wonder Paper inside out. After the furniture or woodwork has been gone over, you can still use your Wonder Paper on the floor.

And when you're through—throwaway! No dust to shake out or wash. No bother at all. The most obvious part of housework is done in half the time and with half the effort. Doesn't the idea appeal to you?

Special Offer

Wonder Paper is made by the makers of the famous P.A.A.-SANI heavy waxed paper in the Green Box. Most grocery hardware and department stores sell Appleford Wonder Paper. If yours doesn't, just send the coupon and we'll give you a new and unique booklet entitled "Leftovers," containing one hundred recipes, as a bonus for your trouble.

Appleford Paper Products, Ltd., Hamilton, Ontario, Canada

Enclosed 25c for which please send me one full-size package of WONDER PAPER and your 100 recipes for "Leftovers."

Person Balm: The unrivaled toilet requisite. Essential to every dainty woman. Imparts rare charm and beauty to the complexion. Softens and beautifies the skin. Makes hands daintily white. Cools and refreshes. Relieves rashes. Ideal for the feminine disinfectant. Delicately fragrant. Swiftly absorbed into the tissue, leaving no stickiness. Persian Balm invariably creates a subtle elegance and charm.

THE RHYMING OPTIMIST

By Aline Michaels

HEART OF GOLD

Life is a flower with a golden heart; Though petals after petals drop away As one by one the swift-winged years depart, Still something of its charm and fragrance stay.

As ever wider opens life the rose, Still heavier, more potent grows its scent, And rarer new loveliness the hours disclose, Surpassing speech, yet strangely eloquent.

A flower is life; yet, as youth's petals fall, And flying years reach out with eager clutch, Time is defrauded; he cannot take all; But only graces valued overmuch: For not until the final leaves unfold Does it reveal its matchless heart of gold.

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple but strong—another "Graves' Worm Exterminator."

New Motor Law

Financial Responsibility Insurance Legislation Soon Effective In B.C.

British Columbia's new automobile insurance legislation, passed at the last session of the legislature, will come into effect September 1. It was announced following a session of the cabinet when an order-in-council was passed fixing the date in conformity with Ontario and other provinces in the Dominion having similar legislation. The new legislation is known as financial responsibility insurance, and the object is to eliminate from the streets and highways irresponsible drivers of motor vehicles.

A Real Sport

It happened in front of the Palace. Two lay-offs were chewing the rag.

"What're you tonight?" asked one. "How about takin' in a movie? I'll take our minds off the depression."

"S'orry, old man," was the answer. "But I can't make it. I've got a bridge date."

"That's okay, too," was the amazing retort. "I'll jump off with you."

Drigible Scrapped

The Long anticipated dirigible and training ship for United States navy flyers, has been shorn of helium, engines and name through order of de-commissioning the craft for reasons of "old age and economy."

New Construction Brick

A new construction brick, having a high fusion point and almost no shrinkage, has been perfected. Material used for the brick was Georgia kaolin, a pure form of white clay.

for PIMPLES

Add an ounce amount of cream to one ounce of Minard's Liniment. Rub gently on face. Clear up your skin!
